ORAL ONCOLOGY CONNECT – EDUCATION SERIES

# ICanCaRe 2<sup>nd</sup> International Oral Cancer e-Conclave

“CAPACITY BUILDING for ORAL CANCERS”

APRIL 2022 – ORAL CANCER AWARENESS MONTH

India ranks No. 1 in terms of number of Oral Cancer patients in the World. Oral Cancer is a public health issue. It is easily detectable, it is easily treatable, and more importantly, it is preventable cancer. But still unfortunately we see these cases at a very late stage when it becomes very difficult to cure the patient.

EASILY DETECTABLE (CHOTA DAANA) – a regular simple oral examination by self at home every month and a clinical examination by a general physician, dental, ENT or surgeon can detect any lesion early. What we say – *CHOTA DANA – JAB BHI DEKHO CHOTA DANA USKI JAANCH JARUR KARANA, CANCER KO BANNE DO NA NASUR, JALD KARO ISHHE DOOR.*

EASILY TREATABLE – Treatment has changed completely with specialized centers and trained specialists available for oral cancers treatment. Scarless surgeries and microvascular reconstructions, giving cosmetic, anatomical, and functional results maintaining speech, swallow, and eating ability to as normal as possible. Updated radiotherapy equipment and modern chemotherapy with immunotherapy and targeted therapy have changed the outcome for these cancers.

MOST PREVENTABLE – the cause is known – Tobacco chewing and smoking with alcohol. Tobacco is a treatable disease; quitting is difficult but not impossible. Trained certified tobacco cessation specialists with protocol-based intervention are treating successfully the tobacco users. Anyone taking tobacco is at high risk of oral cancers.

WHAT WE NEED is ORAL CARE AND TOBACCO CESSATION specialists at every corner for prevention, early detection, local treatment, and guiding the patient for the right treatment and specialized centers.

WHAT MATTERS is The BEST OUTCOME FOR these patients. THAT’S THE THEME OF THE 2<sup>nd</sup> ORAL CANCER E-CONCLAVE - CAPACITY BUILDING FOR ORAL CARE. To encourage the youth we have planned E-Quiz on the theme of the day and 20 prizes to be won as scholarships for India’s first Gujarat University accredited CERTIFIED TOBACCO CESSATION SPECIALIST course!

Foundation for Head and Neck Oncology, Sterlings Cancer Hospitals, MAX Hospital, and Gujarat University joined hands to bring the stalwarts in the field of oral cancer in the month of April the Oral Cancer Awareness month on ICanCaRe Sunday Live to talk about what and how to build an ecosystem to tame the KING of all cancers - ORAL CANCER.
